

Defibrillator

An additional Defibrillator has been installed at Castle Private Club. This brings the total number available within Northwich to 22. This has been jointly funded by Northwich Town Council, Cheshire West and Chester Ward Councillor budgets, Northwich Rotary Club and Castle Private Club.

Should an emergency arise and the need to use a Defibrillator is required, the following process is to be used. Dial 999 immediately. If you are unsure where the nearest Defibrillator is located you will be told, along with further instructions.

All Defibrillators are regularly checked and maintained by Northwich Town Council.

Northwich Skate Park

Northwich Town Council has now been successful in our funding applications to FCC Communities for £100,000, Spacehive and £16,000 towards the project from Cheshire West and Chester Council. This is a great achievement and means that the funding requirements towards this project are almost reached.

Next steps are to finalise the plans, appoint a Contractor and hopefully look to commence the project in the Spring.

Northwich Artisan Market

Did you know that Northwich Town Council have a dedicated branded stand at each Artisan Market held in town the second Saturday of each month? This gives an ideal opportunity for residents to speak with Councillors about any matters or concerns they have. Councillors are in attendance and there will be a board clearly marked with their names and the Wards they represent. The stand is regularly shared with our partners, such as Northwich BID (Business Improvement District), PCSO's (Police Community Support Officers) and local charities. Helpful information is readily available. Our stand is usually situated along Witton Street between Subway and Santander Bank. Please come and say hello.
